

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

is introduced is south-western Colorado, and, in particular, the curious cañons of the Mesa Verde, which have been only recently explored and found unusually rich in abandoned homes of the cliff-dwellers; one is also made acquainted with the beautiful mountain scenery of the San Juan country, through which the cañon district of the Rio Mancos is approached from the north. The introductory chapters present in brief the history of the settlement of the south-west from the earliest Spanish explorations to the recent Anglo-American occupation. Then follows the personal narrative of the author's visits to the region, with a detailed account of his researches. Mountain-climbers will find the story of the ascents of Mount Spaeffel and Uncompahgre Peak of special interest. The work is profusely illustrated. The 180 pages of text are interspersed with some 60 full-page illustrations, heliotypes, and "half-tones." "The Land of the Cliff-Dwellers" can be procured of the sales-agents of the Club, Messrs. W. B. Clarke & Co., 340 Washington Street, Boston.

— "American Mental Arithmetic" is the title of one of the American Book Company's latest school-books, by A. M. Bailey, professor of Mathematics in the Kansas State Normal School at Emporia, Kan. The designation "American" is doubtless given to the volume from purely patriotic motives, as there is no apparent reason why it would not be a good book to use in any school where the English language prevails. Price, 35 cents.

— Charles L. Webster & Co. announce that they have arranged with Henry George for the publication of his new work, "A Perplexed Philosopher," being an examination of Mr. Herbert Spencer's various utterances on the land question, with incidental reference to his synthetic philosophy. They have also arranged with Mr. George for the control of his former books and will issue them in a uniform edition. In "A Perplexed Philosopher" the main argument is an examination of Mr. Spencer's position on the land question. In 1850 Mr. Spencer issued his first book, "Social Statics," in which he denied the justice of the present treatment

of land. Later he seemed anxious to minimize and explain away these utterances, and finally he formally withdrew them. In his last book, "Justice," the recants and opposes them. Mr. George brings together and analyzes these various utterances. He also directly attacks the Spencerian idea of evolution, — that is to say, the idea of evolution that eliminates the spiritual element and assumes that the hypothesis of an intelligent Creator is unnecessary. Mr. George argues in favor of the spiritual element in evolution, and the necessity of an intelligent Creator.

— "Induction Coils" is the title of a practical manual for amateur electricians, written by G. E. Bonney (author of "The Electro-Platers' Handbook") and published by Macmillan & Co. The volume is a 12mo of 228 pages, with upwards of a hundred illustrations, and gives a general insight into the construction of ordinary spark coils, medical coils, and batteries for working them. The various chapters treat respectively of inductive theories and experiments, the construction of intensity coils, accessories to coils, special forms of induction coils, some famous coils, batteries, repairs, and useful notes on coils. To these are added a table of copper-wire properties and a list of conductors and insulators. Price, \$1.

— Charles Scribner's Sons announce "Etruscan-Roman Remains in Popular Tradition," by Charles Godfrey Leland. It is only within a few years that Mr. Leland discovered what is now for the first time published in this book, that there exists among the peasantry of secluded mountain districts in Italy, as well as among the numerous fortune-tellers or "witches" of the cities, a vast amount of ancient Etruscan or Roman traditions of extremely varied and interesting character. That no scholars had ever surmised the existence of this lore is due to the fact that it is now in a great measure kept secret, as being strictly forbidden by the priests, and connected with fortune-telling, which is punished by the law. It consists of a worship or invocation of the ancient deities, in which the names and attributes of nearly all

#### CALENDAR OF SOCIETIES.

the old Etruscan gods are still very accurately preserved, with those of the minor Roman rural deities, a very great number of magic ceremonies, medical cures, and preparation of amulets, accompanied with incantations, and all, as appears by the best authority, of classical origin. Thus of the one hundred very ancient Etruscan-Roman magical remedies collected by Marcellus in the fourth century, our author has found about fifty still in use. There are also given many strange beliefs connected with the occult virtues of plants and minerals, of spirits in all natural objects, the reappearance of ancestors' souls in their descendants, of Magonia, the city in the sky, where hail is made, and last, not least, a number of legends connected with these subjects—in all of which may be traced the most striking parallels with passages in ancient Latin writers; showing how much that has long supposed to be dead and forgotten still exists in the memories of modern believers in witchcraft. The same firm also announces a popular edition of the "Cyclopædia of Painters and Paintings," edited by John Denison Champlin, Jr., and Charles C. Perkins.

—The second edition of "The Horticulturist's Rule-Book," by L. H. Bailey, has just been issued by the Rural Publishing Company (Times Building, New York). It has been thoroughly revised, and brought down to the beginning of the year 1892. The volume is a useful and convenient compendium of information for fruit-growers, "truck" gardeners, florists, and others interested in horticulture. The opening chapters are devoted to insecticides, injurious insects, fungicides, plant diseases, and animal pests. These are followed by chapters on weeds and moss, grafting, seed-tables, planting-tables, maturities, yields, and multiplication, etc.

—From Frederick Warne & Co., London and New York, we have received "Electricity up to Date, for Light, Power, and Traction," by John B. Verity, M. Inst., E.E. It is a small volume of 178 pages, bound in vellum, and contains a folding map showing the areas allotted to various electric-supply companies

in London. The book is intended for the general public, not for the electrician, and consequently Mr. Verity has treated the subject in as popular a manner as its nature will admit. (Price 75 cents.)

—"A Review of the Systems of Ethics founded on the Theories of Evolution," by C. M. Williams, soon to be issued by Macmillan & Co., is one of the more important books of the year. The work is a substantial volume of over 500 pages, divided into two parts of nearly equal length, of which the first is historical, giving in detail the position of each of the prominent writers on Evolutionary Ethics; while the second or constructive portion presents the combined results of such independent investigations in chapters dealing with the concepts of evolution; intelligence and "end;" thought, feeling, and will; egoism and altruism; conscience and the moral progress of the race; the ideal and the way of its attainment.

—The progress which has characterized American mining and metallurgy during the past quarter of a century and which has made them standards and models for the whole world has been due, in no small degree, to the *Engineering and Mining Journal*. This paper has not only made those engaged in these industries familiar with the best practice in every part of the world, but it has itself created a practical technical literature of inestimable value to those engaged in mining, metallurgy, and general engineering. The collection and publication in the *Engineering and Mining Journal* of reliable statistics of the mineral industry of the United States, within a few days of the close of each year, is an achievement which has elicited the admiration of statisticians and business men in every part of the world. This work has become so important that this year its publication will require a large separate volume, which will be issued in January, 1893. The constant improvement and greatly increased cost of the *Engineering and Mining Journal* necessitate and justify the increase of its subscription to \$5.

# Dyspepsia

Dr. T. H. Andrews, Jefferson Medical College, Philadelphia, says of  
**Horsford's Acid Phosphate.**

"A wonderful remedy which gave me most gratifying results in the worst forms of dyspepsia."

It reaches various forms of Dyspepsia that no other medicine seems to touch, assisting the weakened stomach, and making the process of digestion natural and easy.

Descriptive pamphlet free on application to  
**Rumford Chemical Works, Providence, R. I.**

Beware of Substitutes and Imitations.

For sale by all Druggists.

## Exchanges.

[Free of charge to all, if of satisfactory character.  
Address N. D. C. Hodges, 874 Broadway, New York.]

For Sale.—A new Model U. S. Army Hospital Microscope (Zentmayer), also  $\frac{1}{4}$ -inch and  $\frac{1}{8}$ -inch Objectives. HENRY C. WELLS, 151 Broadway, New York.

For sale or exchange.—A Stevens' new model pocket shot-gun, 44 cal., with 22-cal. rifle barrel. Just the thing for collecting birds and small mammals. Will exchange for a 22-cal. cane-gun or good books on ornithology. Write for particulars, stating what you have for exchange. R. C. MCGREGOR, 2841 Champa st., Denver, Col.

For sale.—A very fine stone sword (?) so named by myself. It is perfect—15 inches in length, a little over 2 inches in width, and  $\frac{1}{2}$  inch thick. It is of a dark slate color, perhaps limestone, and is the largest implement of the kind known. Some fifteen years ago, when it was not mine, I was offered \$40 for it; since that time it has come into my possession; that price will now buy it. Address Rev. C. FOSTER WILLIAMS, Ashwood, Tenn.

For exchange.—Fine specimens of Wis. fresh-water pearls. I want books or papers on marine and fresh-water algae; also classified specimens of same. I will exchange for Smithsonian reports or crystallized minerals. D. M. ANDREWS, Dodge Centre, Minn.

For Sale or Exchange.—The undersigned has a lot of first-class duplicate bird's skins and sets of eggs, both rare and common, for sale or acceptable exchange. Also about two hundred second-class skins and five hundred eggs, suitable for study specimens, at very low figures. The latter, for starting a collection, are as good as the best, embracing all classes and nearly all families. Also about forty species of fossils, principally Devonian. MORRIS GIBBS, M.D., Kalamazoo, Mich.

## Wants.

A GRADUATE ENGINEER will give instruction evenings in geometry, trigonometry and surveying, mechanics, physics, mechanical drawing and general engineering construction. Five years' experience in field and editorial work on engineering journal. References furnished. C. S. H., 102 Tribune Building, New York.

A POSITION is desired in the South, preferably the Gulf States, where I can teach the sciences. Can also instruct in other branches. Salary only nominal, as I am simply desirous of employment while spending the winter in the South. A private family preferred, but will accept regular school work if not too confining. MORRIS GIBBS, M.D., Kalamazoo, Mich.

WANTED.—By well-qualified and experienced science master and associate of the Royal School of Mines, London, aged 26 (at present in England), a mastership in technical college or university for any of the following subjects: Engineering sciences, geology and mineralogy, physics, chemistry and metallurgy, etc., etc. Can provide excellent references and credentials. Apply, J. G., 102 Sussex St., Rochdale, England.

A GRADUATE of the University of Pennsylvania and a practical mineralogist of twenty years' experience desires to give his services and a cabinet of 25,000 specimens, all named, with about the same number of duplicates, in minerals, crystals, rocks, gems, fossils, shells, archaeological and ethnological specimens and woods to any institution desiring a fine outfit for study. The owner will increase the cabinet to 50,000 specimens in two years and will act as curator. Correspondence solicited from any scientific institution. J. W. Horter, M.D., Ph.D., San Francisco, Cal., General P. O. Delivery.

CHEMIST AND ENGINEER, graduate German Polytechnic, Organic and Analytical, desires a position in laboratory or chemical works. Address 213½ E. 7th Street, New York, care Levy.

## The American Geologist for 1893.

Edited by PROF. S. CALVIN, University of Iowa; DR. E. W. CLAYPOLE, Buchtel College; JOHN EYERMAN, Lafayette College; DR. PERSIFOR FRAZER, Penn. Hort. Soc.; PROF. F. W. CRAGIN, Colorado College; PROF. ROBT. T. HILL, U. S. Irrigation Survey; DR. ANDREW C. LAWSON, University of California; FRANK D. KNOWLTON, U. S. National Museum; JOSEPH B. TYRRELL, Geol. Sur. of Canada; E. O. ULRICH, Minnesota Geological Survey; PROF. I. C. WHITE, University of West Virginia; PROF. N. H. WINCHELL, University of Minnesota. Now in its Xth volume. \$3.50 per year. Sample copies, 20 cents. Address

THE GEOLOGICAL PUBLISHING CO., Minneapolis, Minn.

America's Venerable and Only Weekly Eclectic

1844.

1893.

FOR NEARLY FIFTY YEARS

## Littell's Living Age

Has Stood Peerless in the Realm of Periodical Literature.

In establishing this magazine its founder sought to present in convenient form a history of the world's progress by selecting from the whole wide field of EUROPEAN PERIODICAL LITERATURE the best articles by

### THE ABLEST LIVING WRITERS

in every department,

BIOGRAPHY, HISTORY, LITERATURE, TRAVELS,  
SCIENCE, POLITICS, CRITICISM, ART,  
FICTION AND POETRY.

"Only the best has ever filled its pages; the best thought rendered in the purest English. Nothing poor or unworthy has ever appeared in the columns of THE LIVING AGE."—*The Presbyterian, Phila., April 13, 1892.*

A WEEKLY MAGAZINE, it gives more than  
Three and a Quarter Thousand

double column octavo pages of reading matter yearly, forming four volumes; presenting a mass of matter

Unequalled in Quality and Quantity by any other publication in the country. In the coming year THE LIVING AGE will continue to be  
THE REFLEX OF THE AGE IN WHICH IT LIVES.

The quickened interest in things historical occasioned by the coming of this Quadri-Centennial has enabled the publishers to make a **Most Happy Arrangement** whereby they can present one of

### The Most Liberal Offers

ever made for the consideration of an intelligent class of American readers, viz.: a \$5 00 copy of **A Standard History of the U. S.** at the nominal price of 50 cents, when taken in connection with THE LIVING AGE.

Littell's Living Age, one year, postpaid, \$8 | FOR  
Ridpath's History of the U. S. of America, 5 | \$8.50

### Ridpath's History of the U. S.

By JOHN CLARK RIDPATH, LL.D., author of the "History of the World," etc., has received the emphatic endorsement of leading educators and of the press of America. REV. CHAS. W. BENNETT, D.D., *Professor of History, Syracuse University*, says, "Whether judged by the thoroughness of research the accuracy of statement, or the purity of style, it occupies a foremost place among United States Histories."

The publishers of THE LIVING AGE are having prepared for their use **A Special Edition** of this great work, which by the addition of new matter appearing in no previous edition, will bring the history down to the present time. It will be printed in bold, clear type, on heavy, white book paper, and bound in extra fine cloth, making one large Royal Octavo volume of over 800 pages. Send for descriptive circulars

The above price includes postage on THE LIVING AGE only. The book must be sent at the subscriber's expense.

THE LIVING AGE is published weekly at \$8.00 a year, free of postage.

**TO NEW SUBSCRIBERS FOR THE YEAR 1893** will be sent *gratis* the two October issues containing a powerful story by Frank Harris, *editor of THE FORTNIGHTLY REVIEW*, entitled **PROFIT AND LOSS**, and also the numbers of 1892 published after the receipt of their subscriptions.

The publishers continue their popular clubbing arrangements whereby one or more other periodicals can be obtained at greatly reduced prices.

Clubbing rates and circulars more fully describing the above and other offers will be sent on application.

Sample copies of THE LIVING AGE, 15 cents each.

Address, **LITTELL & CO.,**  
31 Bedford St., Boston.
